Professional Summary

Computer Science (Cyber Security) student with hands-on experience in AI evaluation, software development, software testing, cybersecurity, and web technologies. Skilled in Python, Java, C++, JavaScript, SQL, Linux, and problem-solving. Experienced in evaluating Large Language Model (LLM) outputs, performing quality assurance, developing web applications, and building networking tools. Strong analytical thinker with a passion for AI systems, secure software development, and solving real-world technical challenges.

Education

Sanjivani University Bachelor of Computer Science (Cyber Security) CGPA: 7.35/10	2024 – Present
Shree Ganesh Junior College Higher Secondary Certificate (HSC) — 70%	2024
Secondary School Certificate (SSC) Percentage — 81%	2022

Professional Experience

LLM Intern — Ethara AI - Evaluated AI-generated responses for accuracy, relevance, consistency, and overall quality. - Conducted prompt testing across multiple domains and identified hallucinations and factual inaccuracies. - Assisted in annotation, content review, and AI quality assurance workflows. - Documented evaluation findings and provided structured feedback to improve model performance. - Applied analytical reasoning and critical thinking while assessing LLM outputs.	Feb 2026 – May 2026
Cybersecurity Intern — SYNTECXHUB - Worked on scripting, technical analysis, and structured problem-solving tasks. - Assisted in documentation, troubleshooting, and workflow management. - Gained practical exposure to Linux systems and secure development practices.	Nov 2025 – Jan 2026
Mobile App Testing Intern — PRAM Educate IT Solutions LLP - Performed manual testing of Android applications. - Identified functional defects, UI inconsistencies, and usability issues. - Collaborated with developers and documented bugs for resolution. - Improved application quality through systematic validation and testing.	Jan 2025 – Aug 2025
Front-End Development Intern — Saiket Systems - Developed responsive web interfaces using HTML, CSS, and JavaScript. - Improved UI consistency and cross-browser compatibility. - Participated in debugging and collaborative development activities.	Aug 2025 – Sep 2025

Technical Skills

Programming Languages: Python, Java, C++, JavaScript, SQL

AI & Data: LLM Evaluation, Prompt Engineering, Data Annotation, AI Response Assessment, Fact Verification, Content Classification

Software Development: Object-Oriented Programming, SDLC, REST APIs, Debugging, Problem Solving

Testing & QA: Manual Testing, Bug Reporting, Test Case Execution, Quality Assurance

Cybersecurity: Linux, Networking Fundamentals, TCP/IP, Vulnerability Assessment

AI Tools: ChatGPT, Gemini, Claude, Perplexity, NotebookLM

Tools: Git, GitHub, VS Code, Windows, Linux

Web Technologies: HTML, CSS, JavaScript

Projects

Role-Based Project Management System

- Developed a role-based project management platform with Admin and Student access control.
- Implemented task allocation, progress tracking, reporting, and workflow management.
- Built responsive interfaces using HTML, CSS, JavaScript, and database integration.

AI-Powered Insurance Assistant

- Developed an AI-enabled insurance assistant for document analysis and user interaction.
- Integrated AI APIs for intelligent question answering and claim assistance workflows.
- Focused on usability, automation, and efficient information retrieval.

Professional TCP/UDP Port Scanner

- Built a Python-based TCP/UDP port scanner using socket programming.
- Implemented network analysis, port discovery, and robust error handling.
- Strengthened understanding of networking protocols and system-level programming.

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- AI for All: AI Appreciate – Intel & Digital India
- Software Engineering Job Simulation – JPMorgan Chase & Co. (Forage)
- Python Programming for Beginners
- Java Programming for Beginners

Achievements

- Completed 4 internships across AI Evaluation, Cybersecurity, Software Testing, and Front-End Development.
- Built multiple software, AI, and cybersecurity projects using Python, JavaScript, and SQL.
- Gained practical experience evaluating LLM outputs and AI-generated content.
- Strong foundation in software testing, debugging, and quality assurance practices.

Relevant Coursework

Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, Software Engineering, Artificial Intelligence Fundamentals, Cyber Security.
